Research & Degrowth Newsletter, February 2017

We are really happy to announce our next Summer School on Degrowth. This year the school will focus on transformations; all the material, cultural, psychological, spiritual, political, fast, slow, deep, across scales transformations, that need to happen if we are to achieve diversity, fairness. Please note also the call for the next Degrowth conference has been extended and is also open to small scale events. Check out the publications they include some we missed in our last newsletter. Our Degrowth in the News has a brand new section with different language: (English), hurray!

R&D News

1. We are happy to announce the 4th [Summer School on Degrowth and Environmental Justice](#).

With the title Transformations that sustain life, the school will take place from **June 25th to July 7th 2017** in Barcelona (Spain) and Cerbère (France).

Amidst the waves of political or institutional changes hinting at an increasing or global trend of closure and otherness?, at a surge of violence, coupled with reactionary and conservative attitudes, this summer school will pursue the alternatives and narratives associated with deeper-level transformations. We will talk about the type of transformations that result in absolute reductions of material and energy throughput, in environmental crimes and social injustice but also ? the ones that provoke and facilitate transformations in the attitudes leading towards embracing differences and enhancing conviviality.

All the information can be found at <https://summerschool.degrowth.org/>

Please note the **deadline** for applications is **March 15th 2017**

2. The deadline to submit a proposal for the [next Degrowth conference](#) has been extended until **15th march**. **Please note that** we are also happy to collect applications for smaller scale decentralized local events which could take place during the conference all around the world.

3. We have updated the [website of the book Degrowth. Vocabulary for a new era](#). It has a list has an updated of all foreign editions (10 languages) as well as [reviews and press](#) articles related to it

4. Take a look at our collaborative [Degrowth Audiobook Podcast](#) project. People passionate about degrowth started to record individual chapters of the Degrowth Vocabulary book. Each chapter recording is published as a Podcast episode. Over time, we collectively managed to transform the entire English version of the book into an audiobook. A few weeks ago, we started with the German version and other languages are soon to follow. If you are interested in the project and want to contribute, just write an email to [Robert Orzanna](#).

5. Federico Demaria published the article [When degrowth enters the parliament](#) in The Ecologist after his debate on [The End of Growth?](#) at the House of Parliament in the UK.

6. Regular updates on our activities?
